# Help Keep Our Employees Safe

---

## Your family pet provides companionship, loyalty and a sense of security.

When our meter readers or service employees come to your home, your dog may sense it needs to protect you.

Remember:

- Dogs instinctively want to protect their owners and their territory.
- Even a small dog can inflict a painful bite.

## Before your next meter read or service appointment:

- Confine your dog away from the meter or where our service person will be.

**By company policy, our employees are not allowed to enter an area that they believe is unsafe.**

To locate your next meter reading date, refer to your bill or request an annual schedule by calling **1-800-427-2200**.

## Clear a safe path so we can continue to serve you safely.

Look around your home for other unsafe conditions. Clear items that block the path to the meter, such as: overgrown vegetation, tools, toys, construction materials or other debris.

Thank you for your help!

*Glad to be of service.®*
